PROVINCIA DI NAPOLI

Naples Province Environmental Authority  
Stocking and Treatment Plant for Special Waste

Authorizations to Work in Sites of Competence  
of Naples Port Authority and Marine State-  
Owned Sites.

Established at beginning of **'80 on the bequest of an already existing activity since '50, of-fact**, from three generation Rotrafer s.r.l. deals with recycling materials, naval, industrial and special demolition, decommissioning, reclaiming and marketing of every kind of metal, asbestos reclamation, polluted sites reclamation and mapping of sites polluted from hazardous waste.

At first company started with competing in Defense Ministry call for selling and demolition of Navy Ships, with or without the operation of recovering from the seabed.

During the years Rotrafer srl expanded his job in the directions of industrial and special demolitions, in particular, in petroleum and petrochemical sector, with destroying the refining plants.

**In 90's, with italian sensibilization campaign** about dangerous effects of asbestos and with new italian laws of asbestos waste management, the company obtain the authorizations to do this delicate jobs.

# ROTRAFER<sup>srl</sup>

## Demolitions

Special, naval and industrial demolitions are the starting point and core business of Rotrafer srl.

We have an extensive experience in this sector and occupy of all the phases of the demolitions, from the preliminary projects to waste management.

Answering, furthermore, to a growing interest of the market, company deals with also naval micro-demolitions, offering all the services of cancellation of the boat from the in charge port authority register.

Being up to sustain important jobs

Also in the sector of the reclamations Rotrafer srl deals with all the phases of the job, from preliminary polluted site chemical mapping to all the engineering operations to do.

We have done numerous operations in asbestos reclamations, both compact and friable.

Our workers are constantly trained on this delicate matter, in particular about risk and devices to use for safe working and avoiding problem for their health.

Work health and safety is our creed and our mission.

Our ecology is in facts.

Innovations and technologies to respect  
environment is our aim of working.

We want more.
